Warranty

Solaris 2020 includes a 2 year limited liability product warranty covering defects due to manufacturing and assembly. For more information visit campfireaudio.com/warranty
Use Instructions

To remove your earphone cable pull the cable in the direction parallel to the earphone connector. Avoid pulling the cable at an angle, as this can damage the mmcx connectors of the cable and/or the earphones.

Take care not to drop your earphones. Each Campfire Audio earphone holds a sensitive and finely tuned transducer. Sudden shocks or impact to the shell can potentially cause damage or alter the performance of the earphone’s transducer.

Take special care to keep the earphone openings clear of debris and wax. Carefully use the clearing tool included with your earphones to remove build up from the earphone. Take extra care not to push any foreign objects into the canal of the earphone openings. Avoid moisture build up on the surface and in the interior of the earphone body.

Opening the body of the earphone will damage the seal of the shell and alter the precision tuning of your earphone. Tampering, opening, or altering the shell will void the warranty of your earphone.

Note that extended listening periods at high listening levels can negatively impact your hearing over time. Please enjoy your earphones responsibly.

Care Instructions

Take care not to drop your earphones. Each Campfire Audio earphone holds a sensitive and finely tuned transducer. Sudden shocks or impact to the shell can potentially cause damage or alter the performance of the earphone’s transducer.

Damage to the earphone transducers (drivers) are not covered under the earphone’s warranty protection and are subject to a reasonable fee for repair.

Note that extended listening periods at high listening levels can negatively impact your hearing over time. Please enjoy your earphones responsibly.
